

# Register Casper Network Validator Information

Hello Validators,

We are CasperStats.io, is a Casper Explorer that granted by DEVxDAO and endorsed by CasperLabs.

To protect the POS network and the market we have to pursue more people to stake to the network

Recently, many CSPR investors ask us how to identify validator nodes to have the trust for staking their tokens, so we would like to make this form to help you reach out the potential investors.

Validator Public Key \*

## Details

I'm Ushakov (validator's brandname) a professional blockchains dev & run a validator nodes on a lot of blockchains. I am an individual validator, working on creating a staking service <https://stake2.me> (in development)

I have ready infrastructure for rapid deploy a new testnet or mainnet nodes in most popular ecosystems (Polkadot substrate and Cosmos tendermint).

I am professionally engaged in the installation and maintenance of validator nodes for a long time and have a lot of experience in this area. By accepting me as a validator in your network, you can be sure that my validator will be updated in a timely manner, fully protected, with high uptime, and hot-reserved with the second node in case of problems with the main node.

For details please visit my full validator portfolio:

## Details

Casper Advisor, Genesis Validator;

We have three nodes under management, this is the public one.

Our ethos is to implement secure and over-spec'd nodes; Our validator nodes operate under 5% utilization for memory, disk, I/O and processor - the rationale is that our time is worth more than the cash it costs to maintain a high end infrastructure. If you do it right, then the only time you need to pay attention to a node is when there's an update (never missed one), and when there's an "Act of God" (aka; act of government!) that affects everyone (likely).
